

NOVA

Made for operators. Built for the whole company.

ONE-PAGER · SAVINGS BRIEF

WHAT IT IS

An AI operating team that recovers time, cash, and margin — without hiring another analyst.

NOVA coordinates strategy, finance, sales, marketing, operations, and research in one conversation. Ask once; agents investigate and recommend from shared context — while your team keeps approvals and money moves. The value is measured in hours returned and dollars protected.

HOW MUCH YOU CAN SAVE

~\$16k_{/yr}

Time recovered

18 manager-hours / month back
from context-switching across
tools (~\$75/hr loaded).

~\$78k_{/yr}

Hire avoided

Replace the “junior analyst for
reports” need — keep humans for
judgment, not hunting.

7 days

Cash unlocked faster

Illustrative DSO improvement
(35→28 days) from Ledger-led
collections cadence.

WHERE THE SAVINGS COME FROM

Fewer handoffs

One question reaches finance, sales, and ops together — no email ping-pong.

Less duplicate tooling work

Agents sit on top of email, docs, accounting, and CRM instead of adding another silo.

Earlier exception detection

Overdue invoices, dormant accounts, and inventory risk surface before they compound.

People stay in charge

NOVA drafts and recommends. Approvals and customer actions stay with your team.

WHO SAVES THE MOST

SMALL BUSINESSES

Owner-operators

Get a full team's clarity without adding headcount — hours back every week.

GROWING COMPANIES

Multi-team ops

Cut coordination tax as departments form — shared context, fewer collisions.

LARGE ORGANIZATIONS

Multi-site leaders

Surface exceptions across sites faster; route work with humans on approvals.
