

PITCH DECK · 2026

NOVA

Recover time. Protect
cash. Grow without
adding headcount.

An AI operating team that shows up in savings —
not in another tool bill narrative.

THE PROBLEM

Fragmented tools quietly burn money every week.

7.4 hrs

lost per manager / week hunting context
across apps and spreadsheets

\$28k

annual loaded cost of that lost time at
~\$75/hr

\$85k

fully loaded cost of hiring one junior analyst
to paper over the gap

Directional SMB labor & tooling benchmarks for pitch narrative

THE INSIGHT

Savings come from a team, not a chatbot.

Specialists that share memory cut handoffs, catch exceptions earlier, and return hours to people who already run the business.

1

conversation entry point

6

persistent specialists

40%+

faster cross-team decisions

0

autonomous money moves

PRODUCT

Six agents. One shared brain.

Atlas

STRATEGY

Turns findings into decisions.

Ledger

FINANCE

Cash, margins, anomalies.

Scout

SALES

Pipeline & dormant accounts.

Signal

MARKETING

Campaigns from real segments.

Relay

OPERATIONS

Inventory & delivery risk.

Prism

RESEARCH

Market & competitor signal.

Where the dollars come back.

~\$16k

Time recovered / year
18 hrs/month × \$75 loaded = ~\$1,350/mo

~\$78k

Hire avoided / year
Analyst capacity without adding headcount

7 days

Faster cash cycle
Illustrative DSO 35→28 with Ledger cadence

\$1.3k+

monthly labor value from 30 min/day saved per manager

12x

first-month savings multiple vs. coordination effort for a typical Pro team

Protect what's already yours.

20%

illustrative profit recovery target when cash + dormant sales actions run together

62 days

example overdue account age NOVA surfaces before write-off risk grows

2–3×

faster exception detection vs. weekly spreadsheet reviews

Ledger watches receivables. Scout watches dormant revenue. Atlas turns both into a plan your team can approve.

SAVINGS BY COMPANY SIZE

Different altitude.
Same kind of win.

SEGMENT	PRIMARY LEAK	WHAT NOVA RETURNS	ILLUSTRATIVE ANNUAL SAVE
Small	Owner context-switching	Hours + fewer fire drills	\$12k-\$25k
Growing	Department handoff tax	Faster decisions + less rework	\$40k-\$90k
Large	Multi-site blind spots	Earlier exceptions + routed actions	\$150k-\$400k+

Ranges combine labor recovery + avoided coordination overhead; actuals vary by stack and process maturity

Ask once. Get a coordinated answer.

01 · Intake	Plain-language question
02 · Route	Right agents activated
03 · Investigate	Shared memory + tools
04 · Synthesize	Atlas packages the decision
05 · Act	Humans approve next steps

< 90s

target time to first multi-agent briefing

4-6

agents typically involved in a cross-functional query

COMPARED TO THE ALTERNATIVE

NOVA vs hiring your way out.

\$85k

one junior analyst / year — still needs coordination

~\$16k

time recovery alone from NOVA — before cash & revenue wins

5x

cheaper path than adding analyst capacity for reporting

weeks

to value — not a 3–6 month hiring cycle

100%

of approvals stay with your people

WHO IT'S FOR

Small tables to large floors.

Small

Owner-operators

A full team's clarity without adding headcount. Biggest win: hours + fewer surprises.

Growing

Multi-team companies

Shared context across finance, sales, and ops. Biggest win: handoff tax removed.

Large

Multi-site orgs

Exception layer on existing systems. Biggest win: earlier risk detection.

THE CLOSE

Stop paying the coordination tax.

~\$16k+

time recoverable / year

~\$78k

analyst hire avoided

7 days

faster cash cycle target
